

Technical specifications

	CHASSIS	FIXED DECK
Engine	1,299 cc four cylinder Petrol Euro 6, multipoint indirect injection, liquid cooled	
Max Power	61 kW @ 6,000 rpm	
Max torque	112 Nm @ 4,300 rpm	
Max Speed	130 km/h	
Gearbox	n° 5 gears + reverse	
Brakes	front: disc Ø 210 mm / rear: drum Ø 203 mm	
Traction	rear	
Tyres	155/80 R13 C 8PR 91/89 N	
Dimensions	length 3,555 mm, width 1,395 mm, height 1,705 mm	length 3,420 mm, width 1,395 mm, height 1,705 mm
Wheelbase	1,830 mm	
Track (rear)	front 1,205 mm / rear 1,220 mm	
Overhang	front 880 mm / rear 845 mm	front 880 mm / rear 710 mm
Turning radius	4,000 mm	
Payload dimensions	n.d. ⁽¹⁾	1,980 mm x 1,330 mm x 290 mm
Gross Vehicle Weight	865 kg	
Payload	n.d. ⁽¹⁾	605 kg
Fuel Tank capacity	35 l (+5 l reserve)	

⁽¹⁾ residual value depending on the outfit weight

PORTER EL

PORTER EL

Affordably simple

EL is the threshold to the Porter range which saves by adopting **simplified** technical solutions, like the breaking and steering traditional systems, making **no compromise on performance**, always on top level in its category.

Fixed Deck

With a total length of just 3.5 m and extraordinary manoeuvrability, it can reach even the most cramped, inaccessible locations, but can still carry objects up to approximately 2 m in length and a total cargo of more than 605 Kg. The 29 cm high alloy dropsides and tailboard, which fold down on three sides of the deck, a load threshold just 72 cm from the ground and the flat, even surface of the deck itself make loading and unloading significantly easier, even when using mechanical loading equipment.

Chassis

Combining extraordinary compactness and agility with sturdy construction and impressive load capacity, it can be configured with a variety of upfits as well as offering advantages in terms of quicker transport times and simplicity of use, combined to its ability to reach particularly inaccessible destinations, such as city alleys or the narrow streets of small historic town centres.

EL, the advantages of choosing PORTER

Equipped with a modern and performing Euro 6 petrol engine Porter EL represents the **ideal solution** for internal circulation purposes, for farms, construction companies, artisans and, generally speaking, for any professional who prevalently works in urban contexts and needs a compact vehicle able to match efficiency and economy.

Petrol MultiTech

Designed to comply with stringent **Euro 6** emissions standards, the petrol MultiTech is a **state of the art** unit meeting tomorrow's requisites for the environment and fuel economy. This **1,299 cc, four cylinder, 16 valve, double overhead camshaft engine** with chain driven camshafts offers significant performances: **power** reaches **61 kW** and **torque** value is **112 Nm** while both fuel consumption and CO₂ emissions are reduced.

Strong points

- Incredible **manoeuvrability** thanks to compact dimensions (3.5 x 1.5 m) coupled with a 4 m turning radius
- Impressive **load capacity** (up to 605 kg)
- High **exploitability** thanks the flat, wide (2 europallet size) and practical deck (dropsides fold down on three sides and a load threshold at 72 cm distance from the ground)
- Considerable **cost effectiveness** due to reduced consumption (up to 5.1 l/100 km in extra-urban use) and low fixed costs
